Grayson County, Texas

General Demographic Characteristics: 2005

Data Set: 2005 American Community Survey

Survey: 2005 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

General Demographic Characteristics: 2005	Estimate	Margin of Error
Total population	113,899	*****
SEX AND AGE		
Male	54,488	+/-601
Female	59,411	+/-601
Under 5 years	8,403	+/-720
5 to 9 years	7,586	+/-1,094
10 to 14 years	7,671	+/-1,217
15 to 19 years	6,773	+/-520
20 to 24 years	6,894	+/-426
25 to 34 years	15,314	+/-1,344
35 to 44 years	15,437	+/-1,093
45 to 54 years	17,522	+/-1,083
55 to 59 years	7,164	+/-923
60 to 64 years	5,552	+/-954
65 to 74 years	8,207	+/-266
75 to 84 years	5,786	+/-594
85 years and over	1,590	+/-555
Median age (years)	37.5	+/-0.7
18 years and over	85,733	+/-279
21 years and over	81,819	+/-751
62 years and over	18,257	+/-799
65 years and over	15,583	+/-450
18 years and over	85,733	+/-279
Male	40,630	+/-361
Female	45,103	+/-371
65 years and over	15,583	+/-450
Male	6,421	+/-170
Female	9,162	+/-407

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of](#)

[the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

- The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.
- For more information on understanding race and Hispanic origin data, please see the Census 2000 Brief entitled, [Overview of Race and Hispanic Origin](#), issued March 2001. (pdf format)

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '**' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
8. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
9. An '(X)' means that the estimate is not applicable or not available.
